**“BULLETIN OF AGRICULTURAL SCIENCE”
IS A LEADING PROFESSIONAL EDITION
OF DOMESTIC AGRICULTURAL DEED IN THE
20-IES OF THE XX CENTURY**

Summary

The 130th anniversary of existence of formalized agricultural research case as an organization is celebrated in 2014. One of its scientific and organizational structures was Agricultural Scientific Committee of Ukraine, founded in November 30, 1918 in Kiev. It was a landmark event in the history of the domestic agricultural deed during the 1918–1927 years.

As a result of historical and scientific analysis of agricultural periodicals, pages reflecting the state of agricultural science and research affairs in the early 20's of last century, the “Bulletin of Agricultural Science” is determined. It was founded by the Agricultural Scientific Committee of Ukraine for the purposes of information support and coordination of the agricultural sector of Ukraine in the 20's of last century.

The purpose of the article is a comprehensive research and historical analysis of the formation and activities of the main journal of the Committee –“Bulletin of Agricultural Science”. Journal out monthly during the seven years of 3–4 printed sheets. Its first issue of was published in September 1922. Acute scientific and organizational issues on the state and development of agricultural science are raised on the pages of “Bulletin of Agricultural Science”. Journal included the following categories: research papers on various branches of agriculture; essays and book reviews; agricultural research activities in Ukraine; agricultural science outside Ukraine; personalities; bibliography; official reports, questionnaires and advertisements. Outstanding agrarian scientists were the circle of leaders – members of the journal.

Agricultural Scientific Committee of Ukraine made a significant contribution to revival and development of publishing in the USSR from the first day of its activity. “Bulletin of Agricultural Science” took an important place in agricultural science and research case in the 20’s of last century. It was the most effective means of scientific communication. Saved as a source periodical “Bulletin of Agricultural Science” in many cases may be the only means of reconstruction and in-depth study of a complex unexplored separate stages of agricultural science and research affairs. It is noted multilateralism reproduction process of agricultural science in Ukraine in its entirety with significant information saturation. Publication of the journal are valuable evidence base to reconstruct a fundamental history of formation and development of agrarian science and research deed in Ukraine, to return to the scientific community names undeservedly forgotten scientists, whose heritages are largely remains displayed only on the periodic publications. One of them is “Bulletin of Agricultural Science”.
