**SCIENTIFIC-ORGANIZATIONAL, TEACHING AND PUBLIC ACTIVITIES
SCIENTISTS-GENETICS VLADIMIR ZOSIMOVSKH**

Summary

Vladimir Zosymovych – known scholar geneticist and breeder was also a talented organizer in science, was able to correctly plan and conduct both fundamental and applied research. The scientist made important scientific expeditions to collect original species beetles, lectured at the courses and presented his results at the All-Union exhibitions. By creating the Department of Genetics, Vladimir Pavlovich revived the genetics of plants in Ukraine. This department became the center around which grouped talented young people, which allowed scientists to develop a number of promising research and to expand the department now known scientific institution. Great service Vladimir Zosymovych is the organization of the Research Councils, associations, conventions, conferences and magazines that exist today. He created a scientific school of genetics and plant biotechnology, whose members still working in different areas of genetics.
