**THE ROLE OF THE FIRST ALL-UKRAINIAN CONGRESS IN THE STUDY
OF THE PRODUCTIVE FORCES AND THE ECONOMY OF UKRAINE IN
SOLVING THE PROBLEMS OF SOIL SCIENCE IN THE MIDDLE OF 20-
IES YEARS OF XX CENTURY**

Summary

It is considered and analyzed a report of the I All-Ukrainian convention in matters of study of productive forces and national economy of Ukraine. Work of natural and agricultural section of collection is reflected on questions of soil science. Accessible monographic and periodic branch editions of libraries are analysed in relation to realization of the report of the All-Ukrainian convention on business study of productive forces and national economy of Ukraine and also his separate programs and work of sections.

An important role in popularization of results of researches of soil science in 20th of past century was played by home agricultural, branch conferences, conventions.

On conferences, conventions home soil scientists had the opportunity to present own achievements in research of soils, to become familiar with the ground collections, manuals and belonging, associate with other specialists.

From 28 December 1924 for 5 January 1925 in Kharkiv the First took place All-Ukrainian convention on business study of productive forces and national economy of Ukraine as one of the first measures from consideration of questions of improvement of situation in a national economy.

On convention 300 different lectures from that close one-third it was sanctified to the questions of rural and forest economy of Ukraine are heard.

In-process convention the scientists of the Agricultural scientific committee of Ukraine, that were involved in-process all sections participated.

The special attention on convention is spared to the questions of the natural districting of Ukraine.

In industry of study of soils of Ukraine convention marked large achievements in the field of it activity. Work of Section of soil science of the Agricultural scientific committee was marked on the stowage of row of corresponding maps and detailed research of soils of the agricultural experimental stations.

Key words: *soil science, agriculture, map of soils, agrarian science, convention.*
