**TRANSFORMATIONS OF SYSTEM SCIENTIFIC SUPPORT
AGRICULTURAL SECTOR IN THE USSR (1931–1935)**

Summary

The results of investigation of formation of academic forms of organization of agricultural science in the USSR in the first half of the 30-i es. Twentieth century. With the help of a chronological and comparative methods to analyze the process of administrative personnel structure modeling and network of research institutions of the Ukrainian Academy of Agricultural Sciences (UAAS). Within a short period of operation, UAAS system has not been subjected to constant and continuous changes depending on the political and economical factors. Initially dominated parts of the structure, and therefore the entire network activity focused on organizing and methodological function. Building a network carried out mainly through reorganization of existing research institutions of the principles of organization, planning and program and methodological unity and communication of research on agricultural production. Specialization of research institutions is established according to the specialization of agricultural production in certain sectors and agricultural areas.
