**SCIENTIFIC AND RESEARCH WORK OF THE KIEV
AGRICULTURAL COMPANY CRISIS THROUGH THE PRIZM OF THE
COMMISSION'S ACTIVITY IN THE STUDY OF THE SOUTH-WESTERN
COUNTRY HOUSEHOLDS**

Summary

Realizing the primary objective of establishing the Company – in 1910 established the Commission for the Study of household's Southwestern region. The main aim of the Commission was the study of farming areas and farms «potato direction» around Kyiv and factories that produce food products potato spirit. The motivation of the Commission for agronomic and economic research was the fact that the potato sector is relatively little known in the specialist literature, while beet farms are dozens of types covered materials. The study of potato farm Woodlands, justified by the fact that these areas have been deprived of all agronomic and economic research as claimed Delegates - is «terra incognita». In his research work, the Commission used different methods: questioning, examination on the spot survey of local hosts. This approach to the implementation of tasks given the opportunity to fully consider and study agricultural facilities.

Kiev Agronomic Company was engaged in scientific activities within its nine sections, which proves the existence of the work and achievements of the Commission to study the economy of Southwest region. CAT published a special issue of revealing all the work of the Commission to study the economy of Southwest region – «Proceedings Committee of Study on farms Zapadnaho South-edge». The first issue of «labor» was released in spring 1912 on its pages scientists, agronomists covering their findings and problems they faced during the study farms Kyiv, Volyn and Podolsk provinces.

By 1917 Kiev Agronomic Company issued five special editions of the work of the Commission, which initially led A. I. Yaroshevich and then – A. F Nesterov. By the Commission during its existence were: A. P. Zaporozhenko, V. Kolkunov, A. I. Zaporozhenko, O. K. Filipovskyy, I. G. Chernish, V. I. Lyaube. The results of the research activities of the Commission published in the periodical «economy» of these items could be read by scientists, agronomists, people involved in agriculture.
